

Email-ready summary — to Lauren Roberts (NHS England)

EMAIL-READY SUMMARY — to Lauren Roberts (NHS England)

Recipient (verified from your mailbox thread): "ROBERTS, Lauren (NHS ENGLAND)" <lauren.roberts3@nhs.net> **Send date confirmed:** exactly 5 days before the meeting = **Saturday 26 Sep 2026** · practical working-day send = **Friday 25 Sep 2026** **Subject:** (threaded) Re: NHS ID Card System proposition — Estonia research for our 1 October discussion

EMAIL BODY (copy-paste or say "send")

Dear Lauren,

Following our discussion on the NHS ID Card System proposition, please find attached our research briefing on the Estonia ID card and health system — the proven blueprint our proposal is built on.

The paper covers:

- Estonia's 98% ID-card coverage and 99% digital health adoption
- The sequence that mattered: identity built first (2002), the national EHR riding on it (2008)
- X-Road decentralised data exchange and the once-only principle by law
- e-Residency economics (≈ EUR 125m state revenue in a single year) and the permission-economy model
- How the same philosophy transfers to the UK's existing three layers (NHS App, NHS Login, NHS Number) — with our fourth layer, the national credential on a secure rail secured by AEGIS

I would welcome any questions ahead of our call on 1 October. A one-page executive summary and the meeting deck are also available if useful.
